

Access Token | Token Durations, Refresh Methods & Invalidation Rules

[Access Tokens for Meta Technologies | Developer Documentation](#)

this documentation includes the process of turning short lived to long lived token of fb

Facebook Page token *never-expire note: The page token has no time-based expiry only when generated from a long-lived user token via `/me/accounts`. It still invalidates if the admin's password changes, they revoke the app, or data access (90-day window) lapses. LinkedIn's programmatic refresh token is available only to approved partners — most developers must re-authenticate when the 60-day access token expires.

Platform	API	Token Type	Expiry	Refresh Method	Notes
Facebook	Meta Graph API	Short-lived (User)	~1-2 hours	Exchange (<code>fb_exchange_token</code>)	Initial login token
		Long-lived (User)	60 days	Exchange from short-lived	تمد قابل
		Page Access Token	No fixed expiry*	Generated via <code>/me/accounts</code>	Depends on user token validity
		App Access Token	No expiry	Not required	App-level access
		Marketing API	No expiry	Not required	Standard access
		SDK Auto Refresh	—	—	Yes (if used within 90 days)

Platform	API	Token Type	Expiry	Refresh Method	Notes
Instagram	Instagram Graph API	Short-lived (User)	1 hour	Exchange (<code>ig_exchange_token</code>)	Initial token
		Long-lived (User)	60 days	<code>ig_refresh_token</code>	Refresh after 24h
		Refresh Window	—	Before expiry	New 60-day window starts
		Client-side Exchange	✗ Not allowed	Server-side only	Security requirement
		Endpoint	<code>graph.instagram.com</code>	—	—

Platform	API	Token Type	Expiry	Refresh Method	Notes
TikTok	Login Kit v2 / Open API v2	Access Token	24 hours	<code>refresh_token</code> grant	Requires daily refresh
		Refresh Token	365 days	—	Long-term validity
		Client Access Token	2 hours	—	App-level
		Creator API Token	24h / 1 year refresh	<code>refresh_token</code>	Business accounts
		v1 API	✗ Deprecated	—	EOL Feb 2024

Platform	API	Token Type	Expiry	Refresh Method	Notes
		Consent for Refresh	—	Not required	Silent refresh supported

Platform	API	Token Type	Expiry	Refresh Method	Notes
LinkedIn	OAuth 2.0	Access Token	60 days	Limited (partners only)	Standard apps must re-auth
		Authorization Code	30 minutes	—	Initial exchange
		Refresh Token	365 days (fixed TTL)	Available to partners	Does NOT reset on refresh
		Max Extension	✗ Not beyond 365 days	—	Hard limit
		Re-auth Required	Yes	After refresh expiry	

Youtube

Token Lifecycle & Refresh

Token Durations

Token Type	Duration	Notes
Access Token	1 hour	Short-lived
Refresh Token	Never expires (unless revoked)	Long-lived storage required

Getting Offline Access

When configuring OAuth, include `access_type=offline`:

http

```
https://accounts.google.com/o/oauth2/v2/auth?
  client_id={CLIENT_ID}&
  redirect_uri={REDIRECT_URI}&
  response_type=code&
  scope=https://www.googleapis.com/auth/youtube.force-ssl&
  access_type=offline&
  prompt=consent
```

⚠ Important:

- The `prompt=consent` parameter forces the consent screen to reappear, ensuring a refresh token is issued
- If you don't include `prompt=consent`, Google won't issue a new refresh token on subsequent authorizations

Refreshing Token

Request:

http

```
POST https://oauth2.googleapis.com/token
Content-Type: application/x-www-form-urlencoded
```

Body:

text

```
client_id={CLIENT_ID}
&client_secret={CLIENT_SECRET}
&refresh_token={REFRESH_TOKEN}
&grant_type=refresh_token
```

Response:

json

```
{
  "access_token": "new_access_token",
  "expires_in": 3600,
  "token_type": "Bearer"
}
```

Storing Tokens

javascript

```
// Recommended database schema for YouTube
{
  user_id: string,
  platform: 'youtube',
  access_token: string,      // Encrypted
  refresh_token: string,     // Encrypted
  expires_at: timestamp,     // UTC (1 hour from issue)
  channel_id: string,        // YouTube channel ID
  scope: string[]
}
```

Errors & Solutions

Common OAuth Errors

Error	Cause	Solution
Error 400: redirect_uri_mismatch	Redirect URI doesn't match Google Cloud Console	Add exact URI to Authorized redirect URIs
invalid_client	Wrong Client ID/Secret	Verify credentials in Cloud Console
access_denied	User denied permissions	User must re-authorize with consent
invalid_grant	Refresh token expired or invalid	Re-authenticate user to get new refresh token

Token Exchange Flows

Platform	Flow
Facebook	Login → Short-lived (~1h) → Exchange (<code>fb_exchange_token</code>) → Long-lived (60d) → <code>/me/accounts</code> → Page Token
Instagram	Auth → Short-lived (1h) → Exchange (<code>ig_exchange_token</code>) → Long-lived (60d) → Refresh → New 60d window
TikTok	Auth Code → Access Token (24h) + Refresh Token (365d) → Daily refresh → New access token
LinkedIn	Auth Code (30m) → Access Token (60d) → Refresh (if partner) → New token (same 365d TTL)

Token Invalidation Conditions

Platform	Conditions
Facebook & Instagram	Password change, app permission revoked, policy violation, 90-day inactivity, admin role removed
TikTok	User revokes access, refresh token expires (365d), account deletion, app suspension, using deprecated v1
LinkedIn	Access token expiry, refresh TTL ends, user revokes access, scope changes, user not logged in
All Platforms	Never store tokens client-side, never expose app secrets, server-side exchanges only, tokens are user-specific
